PROFESSIONAL SUMMARY

Python Full Stack Developer with hands-on experience building and deploying full stack web applications using Django, React, MySQL, and PostgreSQL. Currently working as a Software Developer with experience in production deployments on AWS and third-party integrations including Razorpay and Zoho. Exploring Generative AI concepts through practical projects involving OpenAI API, prompt engineering, and AI-powered applications. Detail-oriented developer with strong problem-solving skills and interest in building practical, user-focused software.

SKILLS

Technical Skills

Python | JavaScript | C | HTML5 | CSS3 | Tailwind CSS | React JS | Django | REST API | MySQL | PostgreSQL | NumPy | Pandas | Matplotlib | Redux Toolkit | Redux Persist | Pydantic | Streamlit | Git | GitHub | AWS | Razorpay Integration | Zoho Integration | CRUD Operations | Authentication | Session Handling | Prompt Engineering | OpenAI API | Image Generation

Soft Skills

Problem Solving | Logical Thinking | Attention to Detail | Adaptability | Team Collaboration | Communication Skills

WORK EXPERIENCE

Software Developer

March 2026 – Present

Void Vector Ventures LLP, Calicut, Kerala

- Built and deployed the company website using Django, Python, and PostgreSQL, hosted on AWS.
- Integrated Razorpay payment gateway and Zoho CRM/tools into the platform.
- Contributing to software development, device integration, and product development workflows.
- Gaining hands-on experience in both hardware and software systems in a fast-paced product environment.

Python Full Stack Development + Gen Ai intern

Sep 2025 – Mar 2026

HACA, Calicut, Kerala

- Built full stack web application features using Django, React, and MySQL.
- Developed backend modules, CRUD workflows, and data management features for web applications.
- Integrated frontend components with backend services and authentication-based access flows.
- Worked on AI-assisted workflow automation and gained hands-on exposure to Generative AI development tasks.

PROJECTS

SkillMap - [GitHub](#)

2026

- Built a role-based skill assessment web application to help users evaluate readiness for specific tech roles.
- Developed backend logic in Django to manage assessments, skill levels, roles, and user progress tracking.
- Designed a dynamic dashboard to display performance insights, readiness scores, and skill progression.
- Integrated MySQL database operations for storing assessment records, role mappings, and user data.
- Implemented CRUD functionality for managing assessments, skills, and progress-related records.
- Added user authentication and session-based access control for secure personalized usage.

AI Data Analyst - [GitHub](#)

2026

- Built a Streamlit application allowing users to upload CSV files, explore datasets, and generate AI-powered insights.
- Implemented automatic column detection, summary statistics, and data visualizations (bar, line, histogram).
- Integrated OpenAI API to generate business insights, key findings, and recommendations from dataset summaries.
- Built a natural language Q&A feature enabling users to ask questions about their data in plain English.

Wedding/Party Theme Generator - [GitHub](#)

2025

- Built a multi-step AI-powered Streamlit app to generate complete event branding from user inputs.

- Chained multiple OpenAI API calls to generate theme title, tagline, invitation text, decoration ideas, and color palette.
- Integrated image generation using OpenAI's image model to produce AI-designed invitation card visuals.
- Implemented session state management to persist outputs and reset on input changes.

Branding Assistant - [GitHub](#)

2025

- Built a Streamlit app that generates brand names, slogans, and AI-designed logos from a business idea.
- Used OpenAI API to suggest creative brand names and contextually aligned slogans for a selected brand.
- Integrated AI image generation to produce logo designs based on brand name, style, and business concept.

My Wedding Planner - [GitHub](#) | [Live Demo](#)

2025

- Developed a web-based event planning application supporting CRUD operations for managing wedding events.
- Implemented Redux Persist for maintaining application state across sessions.
- Built form validation logic and budget tracking features for event management.
- Designed a responsive user interface using Tailwind CSS.

EDUCATION

Bachelor of Technology in Computer Science Engineering

2021 – 2025

APJ Abdul Kalam Technological University, Kerala

CERTIFICATIONS

Python Django Full Stack Development with Generative AI

Sep 2025 – Mar 2026

HACA

ADDITIONAL INFORMATION

Academic Project Lead

- Coordinated cross-functional student teams across multiple academic development projects, ensuring clear delegation, consistent communication, and on-time delivery.

NSS Volunteer

- Participated in and led team-based social outreach programs, developing strong communication, coordination, and organizational capabilities.

Languages Known

- English – Proficient
- Hindi – Proficient
